---

### **Are door locks easy to pick?**

There are no “easy” ways to do it. Some locks are a little easier to pick than others but none are all that “easy”. Depends on how many keys there are in the lock for one. The most common way to pick one is using a set of lock picks to 'rake' the keys keeping pressure on the barrel to turn it.

### RELATED QUESTIONS

### **How do you unlock a door without a key?**

Another great tool to use is a screwdriver. A small or thin screwdriver will work best on interior doors or doors with privacy handles. Simply push the screwdriver into the hole on the doorknob straight through for as far as you can. Then, turn or twist the screwdriver until the lock opens.
