

## MORE QUESTIONS AND ANSWERS

---

### **How do you feel music?**

When we listen to music, multiple areas of the brain are activated including those associated with movement, planning, attention and memory. It changes our brain chemistry as well. Listening to music we enjoy stimulates the release of dopamine that makes us feel rewarded.

### RELATED QUESTIONS

### **Who sang How does it feel in the 1980s?**

"How Does It Feel" is song by the British rock band Slade, released in 1975 as the second single from the band's first soundtrack album and fifth studio album Slade in Flame, in promotion of the film of the same name.

---

### **What does How's it feel mean?**

The sentence means "how does it feel?" This is, by the way, not an accepted abbreviation of does. However, the book is transcribing the way many of us speak. In casual AE it is very common to say "How's it feel?" instead of "How does it feel." I would use this abbreviation in your own writing when transcribing dialog.

---

### **How does it feel dance?**

"Dancing stimulates us physically and emotionally while there are also cognitive and social elements to it," he explains. "You appear to get a much bigger release of endorphins when you dance than during other forms of exercise; it also connects with the emotional centres in the brain."
