FSI research indicates that it takes 480 hours to reach basic fluency in group 1 languages, and 720 hours for group 2-4 languages. If we are able to put in 10 hours a day to learn a language, then basic fluency in the easy languages should take 48 days, and for difficult languages 72 days.

### How Long Does it Take to Learn a Language Abroad?

Studying a language in a place where many people speak your native language, and you can fall back on it, could slow down the language learning process if you don't fight it. Conversely, a full immersion environment could help you speed up how many days or weeks it takes for you to learn a language.

### How Long Does It Take To Learn Korean?

But first, a disclaimer: In many of these studies, language proficiency or fluency is the bar set to determine whether or not the language has been "learned." As you may know, you don't necessarily need to be fluent to be able to speak a foreign language and to be comfortable interacting in that language.
