

## MORE QUESTIONS AND ANSWERS

---

### Is baking soda the same as salt?

Sodium bicarbonate is formed by mixing carbon, sodium, hydrogen and oxygen molecules. This mixture, also known as baking soda, is actually a type of salt.

### What Is The Difference Between Baking Soda and Washing Soda?

Baking soda is a salt chemically known as sodium bicarbonate with the chemical equation  $\text{NaHCO}_3$ . When baking soda reacts with an acid, carbon dioxide is released. This is why it was originally used as a leavening agent in 1846 according to the Smithsonian Magazine.

### How are baking salt and baking soda different?

The chemical make-up makes them different. Salt is  $\text{NaCl}$  (sodium chloride). Baking soda is a bi-carbonate is  $\text{NaHCO}_3$  and in its natural mineral form it is called nahcolite. Bicarbonate of soda in cooking becomes a leavening agent whereas salt is used to enhance a flavor. Baking powder is another "animal" all together.
