MORE QUESTIONS AND ANSWERS

What if absolute value is negative?

Since the absolute value of any number other than zero is positive, it is not permissible to set an absolute value expression equal to a negative number. So, if your absolute value expression is set equal to a negative number, then you will have no solution.

What is the absolute value of a negative number?

The larger absolute value in the equation is 15.5 and is a negative number so the final result is a negative number. Therefore, the result of 10.5 + (–15.5) = –5.0. Work out a few practice problems, and you're bound to absolutely value the fact you asked a great question!

What is the absolute value of negative 11 or abs(-11) or -11?

The absolute value of -11 is the distance between -11 and 0 on a number line. See illustration below where -x is -11: Since the distance between -11 and 0 on a number line is 11, we get the answer as follows: |-11| = 11 Note that the absolute value of -11 can also be written as abs(-11) which may be useful to know if you have a good calculator.

RELATED QUESTIONS

What number is less than absolute value?

2 Answers By Expert Tutors If a number IS NEGATIVE, then the number is less than its absolute value.

Does the absolute value of 0 exist?

No, the absolute value of zero is zero. For real numbers, the law of trichotomy states that every real number is either positive, negative, or zero. |0|=0. The word "positive" is ambiguous: it can mean "≥0" or ">0".
