

MORE QUESTIONS AND ANSWERS

Why is my toe shorter than second?

Your first metatarsal is the thickest. In people with Morton's toe, the first metatarsal is shorter compared to the second metatarsal. This is what makes your second toe look longer than the first. Having a shorter first metatarsal may cause more weight to be put on the thinner second metatarsal bone.

Why is my third toe longer than my second toe?

Continue Reading. If you are very concerned about this I would suggest you have an xray taken of your feet. You do not mention if this occurs on both feet or only one. Looking at an xray you will either notice that the third toe is longer then the second, or perhaps your third metatarsal is longer then the second making your third toe appear longer.

RELATED QUESTIONS

Can you make toes shorter?

Long toes can be surgically shortened. Depending on the severity and length of the toe, there are several methods to surgically correct shorten a toe. In general, the surgery involves removing a portion of the bone at the contracted joint, to realign the toe.

Is it better to have long or short toes?

"Longer toes require muscles to do more work, and exert stronger forces to maintain stability, compared to shorter toes," said University of Calgary anthropologist Campbell Rolian. ... Most animals that run, however, also have extremely short toes.
